=> **Method Overloading :**

Same name methods, provided
different parameters . (In arguments).

=> **Static :**

-> Trying to call a class without creating
the object .

Rules :

-> Static keywords require static objects.

-> Non-Static cannot run within static methods.

Inference :

Objects of made classes hold more

objects ~~of~~ ... ~~classes~~ ... ...
importance than state.

⇒ <u>Inheritance</u> :   Parent & Child relation
                         of the classes.

<u>Syntax</u> :

class Child extends Parent {

}
